# The best looking safety boot you've ever seen?

Is the new Buckler Boots Goodyear welted style safety boot on the front cover here one of the best looking safety boots you have seen? We think it must be but then again we are biased so hopefully you agree. It's code number is **B550SM**, it has a wider fitting than our standard toe cap on Goodyear welted styles and it's available from May onwards.

Also new is **B425SM** which is the replacement style for the leather lined B420SM. It's available now although there are still some B420SM available. In keeping with our affinity with quality leather we think B425SM is the only Goodyear welted safety boot on the UK market with a real cow hide lining - in a class of its own for all day comfort.

You might think it's unusual to introduce a radical change in neoprene/rubber welly design as we head into spring/summer but we want you to have the maximum advance notice of the new **Buckbootz BBZ5060** which will appear on the UK market in August. Go to page 15 and feast your eyes on a completely new design in non safety country boots.

Many Buckler Boots dealers will be aware of the campaign we instigated a few years ago to have speed lace hooks eliminated from the specification of safety boots. The campaign has been revisited frequently since then and we thought you might like to read on page 16 the account with picture of the experience of Jolanda Baarsma who contacted us via our website.

In an ironical twist our B301SM safety boots came joint first with Caterpillar in a recent makes/styles field test conducted by Farmers Weekly. The test denied us overall first because our boots didn't have lace hooks! There has never been a Buckler Boots style with lace hooks! Sling those hooks, keep your customers safe and enjoy good trading over the spring and summer months.

Kind regards,

*Andrew Duncan*

Andrew Duncan  
Managing Director, Buckler Ltd

Innovation has been a key ingredient of Buckler Boots success and we recently introduced another to great acclaim. **Hybridz®** is a new concept in work boots - the convenience of a dealer boot combined with the fitting adjustment provided by lacing.

The concept is simple - at first fitting the wearer adjusts the lacing to get the tension preferred, ties the laces as normal, then locks the bow with second tie, after that you've got a dealer boot with double pull loops and fitting tailored to your foot - which can be put on and removed with the same convenience as a normal dealer boot.

We hear you cry '**why didn't someone think of that before?**'

**STEP 1.** Adjust the lacing to get the tension preferred and tie the laces as normal. Lock the bow with a second tie.

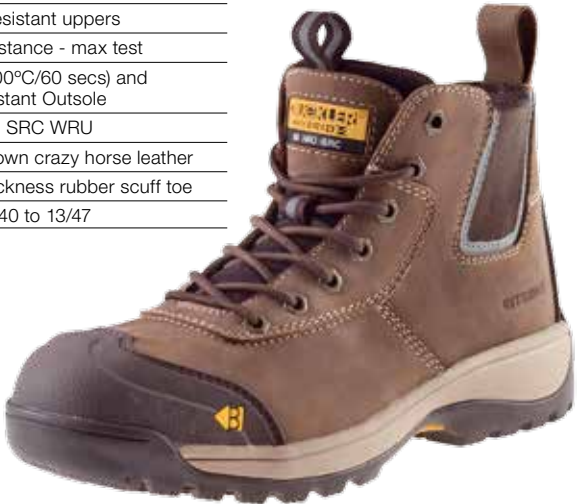

**STEP 2.** Ta dah! Now you have a dealer boot with double pull loops, fitting tailored to your foot and no need to untie/retie the laces.

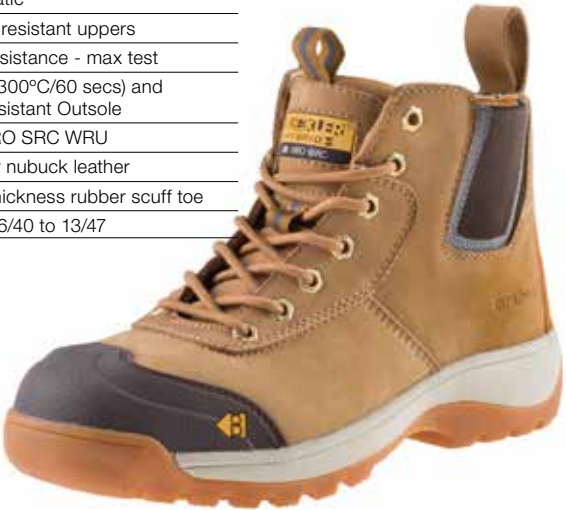

### BHYB1BR

- Steel toecap
- Steel midsole
- Antistatic
- Water resistant uppers
- Slip resistance - max test
- Heat (300°C/60 secs) and Oil Resistant Outsole

## Taking safety boot style to new heights

### BHYRIZHY

- Steel toecap
- Steel midsole
- Antistatic
- Water resistant uppers
- Slip resistance - max test
- Heat (300°C/60 secs) and Oil Resistant Outsole
- S3 HRO SRC WRU
- Honey nubuck leather
- Dual thickness rubber scuff toe
- Sizes 6/40 to 13/47

**Buckler Boots Hyrize** high ankle boots feature uppers which are approx. 2.5 cm / 1" higher than the regular work boot height to give Hyrize that popular combat boot look in a full spec premium quality safety boot .

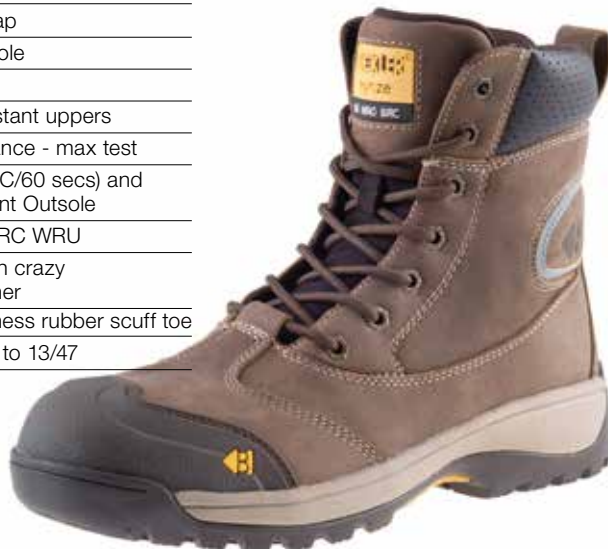

You may recognise a family resemblance to Buckler Boots ground breaking **Hybridz®** lace / dealer boots: same top grade cowhide water resistant leather uppers, same tough Buckler Antelope sole, some similar upper design features and same maximum EN S3 SRC HRO safety certification.

All that in one of the best looking work boots around.

Good looks run in this family.

All Largo Bay styles are manufactured to European **S3 HRO SRC** Standards

EN ISO 20345-1 SB/P/A/HRO/SRC/WRU

- Steel Toe Cap • Kevlar Midsole • Antistatic
  - Water resistant uppers
  - Heat (300°C) & Oil resistant outsole
  - Slip resistance - max test

In 2012 Buckler Boots introduced the safety sneaker to the UK market. We take the concept a stage further with Buckler Boots **Largo Bay S3** safety sneakers, which were developed by our Buckler Boots colleagues in Holland. Safety sneakers bring the true look of the street to the workplace - it's the safety footwear buzz look in continental Europe and it's here now.

- Detachable cushion insoles

When you have worn Safety Buckbootz you'll never buy an ordinary rubber, PVC or polyurethane safety wellington boot again.....Ever!

Neoprene offers a high degree of heat, oil and chemical resistance, full flexibility over a wide temperature range, remarkable toughness and outstanding stretch, insulation and weight saving.

When bonded to natural rubber it creates a waterproof safety boot which is the ultimate in comfort, performance and durability.

Buckler BBZ6000 S5 HRO Safety Neoprene/Rubber Waterproof Boots are EN certified for Buckler Boots to full S5 + HRO (SB+A+E+P+Cleated outsole SRA) and Heat & Oil Resistant Outsole standards:

- Steel toecap
- Steel midsole
- Antistatic
- Energy absorption of the seat region
- Cleated (rubber) outsoles
- Heat (300°C/60 secs) and Oil Resistant Outsole

B

Now with Buckler  
K3 rubber sole

Buckler Boots' non-safety footwear range for wet and mucky weather. Neoprene synthetic rubber is most commonly used in wetsuits, but when it is bonded to rubber it provides the ultimate comfort, performance and durability combination for wellington boots and variants.

Neoprene provides:

- Waterproofing
- Weight saving
- Insulation
- Stretch
- Chemical resistance
- Abrasion resistance
- Oil resistance

Rubber provides many of these benefits whilst maximising durability and sole grip. All Buckbootz™ styles are easy to clean and have detachable cushion insoles.

**A BBZ5222 Springer**

- Ladies knee length boot
- Rubber sole
- Sizes 4/38 to 8/42

**C BBZ5333 Springer**

- Ladies ankle/jodhpur boot
- Rubber sole
- Sizes 4/38 to 8/42

C

**B BBZ5020**

- Knee boot
- Vulcanised K3 sole
- Sizes 5/39 to 13/47

By flaring the front and back straps up to the collar of the boot it keeps its shape when the foot is pushed inside yet maintains the snug calf fitting which is a feature of this boot type.

**BBZ 5060** is another Buckler Boots design innovation. For the past year we have been working on a completely new non-safety neoprene/rubber boot style. Our target was to give this style of waterproof footwear the look of a real quality leather boot at the welt area and to tackle the 'fold in' aggravation when the foot is inserted.

The **BBZ 5060** package is completed by fitting Buckler Boots exclusive K3 wave sole. We think we've created a balance of design and new features which will make **BBZ 5060** the envy of its competitors and a magnet for the discerning country boot buyer.

**BBZ5060**

- Knee boot
- Vulcanised K3 sole
- Sizes 5/39 to 13/47

## Sole Patterns for Goodyear Welted styles

Buckler Boots rubber soles are designed for hard work, safety and durability

### K2 Sole

Buckler Boots' famous sole with bonded, lockstitched toe plate. Probably the toughest sole ever fitted

### K10 Sole

Our K10 sole brings together the key components of our famous and much copied K2 sole and the lightweight

### K8 Sole

The Buckler Boots K8 sole is a dual element rubber sole which reduces weight without com-

### K3 Sole

The Buckler Boots K3 Wave sole has been designed, developed and tested exclusively by Buckler

to a work boot. The disrupted pattern beats flex splitting while the chamfered edges significantly reduce clogging and trapping. SRA certified slip resistance. **Also fitted to our BBZ6000 safety Buckbootz.**

K8 sole to create a high grip lightweight dual element rubber sole with a chunky tread and matching good looks. **Fitted to our B1400.**

promising durability and grip. The K8 has the advantage of greatly reducing muck trapping. SRA certified slip resistance. **K8 sole colours vary between boot styles.**

Boots. The multi-sipe pattern helps to reduce weight, but don't be fooled by it's good looks it is just as tough and durable as our renowned K2 sole. SRC max slip resistance certification.

All four soles are Heat (300°C) and Oil Resistant.

## Safety Key

### EN ISO 20345 2011

Toe protection tested with 200J impact and 15kN compression force. Fuel Oil resistant outsole. (SB)

**A** Antistatic Electrical resistance between 100kΩ and 1000MΩ

**P** Penetration resistant outsole of 1100 Newtons

**E** Heel energy absorption 20 Joules

**HRO** Heat Resistant to 300°C for 60 seconds

**SRA** tested on ceramic tile wetted with dilute soap solution

**SRB** tested on smooth steel with glycerol

**SRC** tested under both the above conditions

**WRU** Water resistant leather uppers

Short code combinations:

**S1** SB + A + E + Closed seat region

**S2** As S1 + WRU

**S3** As S2 + P + Cleated outsole

**S5** As S3 except uppers are in rubber or all polymeric material

**EN420** and **EN388** covering protective glove construction, abrasion and blade cut resistance, tear strength and puncture resistance.

## Sling those hooks!

"Broke my arm because of them! I warn others now! I was just cooking in the kitchen."

Jolanda Baarsma

### Buckskinz Knee Pads

- A special density compound ensures full knee protection, maximum resistance to 'flattening' and full reversion to shape.

# HandGuardz

## B HandGuardz HG3

- EN certified for general use in construction and agriculture.
- Palm area has anti-vibration padding
- Neoprene stretch over fist
- Anti-slip PVC on fingertips and index finger to thumb grip area
- Flexible knuckle protectors
- Spandex stretch cuff
- Available in sizes L, XL and XXL

## A HandGuardz HG1

- EN certified for general use in construction and agriculture
- Palm grip and finger end protection
- Neoprene stretch over fist
- Elasticated cuff with Velcro tab adjustment
- Available in sizes L, XL and XXL

The Buckler **HandGuardz HG3** work glove links cowhide to some great man-made materials to take hand protection and comfort to new heights. Cowhide has been the core material for some great work gloves over many generations of people whose work takes them into tough environments. Not surprisingly, it is also Buckler Boots' favourite material.

Buckler's **HandGuardz™** Protective Gloves bring the very best workmanship and components to hand protection and are tested to EN420 and EN388 standards covering protective glove construction, abrasion and blade cut resistance, tear strength and puncture resistance.
